

Store Health: Audit & Scan

Shopify theme + store setup health check

Store Health checks your theme and store setup, then highlights what to fix first. It finds leftover app code, risky scripts, metafield clutter, oversized files, product content issues, and discount problems. You get a clear report with a Store Health score and category breakdown.

• Read-only • Exports: PDF/JSON • Compare over time • Eight analyses, one report

What we check in each scan

Theme Check

Surface Liquid and theme best-practice issues with clear file and line references.

Scripts & risk

Find risky and performance-heavy scripts, duplicates, and anti-pattern loading.

Metafields

Detect unused, empty, and unstructured metafields across owner types.

Files

Identify oversized and unused files referenced in theme, metafields, and content.

Products

Catch content gaps (SEO, images, descriptions) and messy catalog patterns.

Discounts

Spot stale, overlapping, or risky discount setups that hurt performance and clarity.

Links

Crawl internal and external links to flag broken, redirected, and slow URLs.

AI Visibility

Check how visible a store is to AI shopping assistants and LLM-powered search engines.

Beyond the scan

Two always-on features that run alongside every scan.

Live Signals

A lightweight Web Pixel that watches real shopper sessions: add-to-cart rate, checkout drop-offs, device split, and form errors. Shows exactly where a storefront loses buyers.

Shopify Status

A live mirror of Shopify's official status page, refreshed every 60 seconds. Paid plans get an email alert the moment a platform incident could affect checkout or storefront.

Pricing

Start with a free preview, then unlock full reports, exports, and history.

Free

\$0

4 preview scans: overall score and problem count.

Monthly

\$19.99/mo

Full reports, saved history, PDF/JSON exports.

Yearly

\$199.99/yr

Everything in Monthly, two months free.

Start with 4 free scans.

Install Store Health and run up to four free preview scans on your own store, no credit card required. Upgrade anytime for full reports, exports, and ongoing monitoring.
